FIG. 16

FIG. 17 is a block diagram of a system architecture for a travel agency system.

FIG. 17

190 ↗

FIG. 18 is a block diagram of a system for identifying marketing opportunities. The system includes a Marketing Manager, an Index Parameters block, an Indexing Engine, a Marketing Opportunity List, a Concept Search List, a Structure Search List, a Marketing Opportunity Robot Engine, a Marketing Opportunities cloud, an Internet cloud, a CAAS cloud, a PRMS cloud, and a Marketing Personnel block. The Marketing Manager provides input to the Index Parameters block and the Marketing Opportunity List. The Marketing Opportunity List is analyzed to produce the Index Parameters block. The Index Parameters block is analyzed by the Indexing Engine. The Indexing Engine is connected to the Marketing Opportunity Robot Engine, which is connected to the Marketing Opportunities cloud. The Marketing Opportunities cloud is connected to the Internet cloud. The Internet cloud is connected to the CAAS cloud. The CAAS cloud is connected to the PRMS cloud. The PRMS cloud is connected to the Marketing Personnel block. The Marketing Personnel block is connected to the Marketing Manager.

Yellow Book Online Segment (YBOS)

The Yellow Book Online (YBO) will be an electronic version of the CDC's Health Information for International Travelers. Initially, the YBO will be a verbatim translation of the print version, with a full-text search and retrieval mechanisms. The YBO content will be syndicated to other sites via the use of a direct search link the YBO on iJET.com or through a content window displayed directly from iJET.com.

Later incarnations of the YBO will include enhanced input conditions for search (e.g., full-text search only on a specific country) and enhanced output (e.g., optional summaries of page "hits").

Ultimately, iJET will evolve the YBO into a more comprehensive resource than the print Yellow Book. To this end, a workflow process will need to be developed between iJET and the CDC to ensure that iJET content/commentary/enhancements are fully approved by the CDC.
